Recalls + Safety Alerts

Food, medicine, devices, and cosmetics being recalled by the FDA.

The Learning Registry is a new way to identify and find educational resources online. Content creators, teachers, or everyday Internet browsers can add content to the registry, tagging it according to quality, keyword, and/or alignment to common core standards.

As this information is collected, the most effective resources on particular topics bubble to the top, allowing teachers to find effective course supplements (or even entire courses) with minimal time and effort.

THIS DATA IN ACTION

WeMakeItSafer

Uses feeds from the FDA to provide recall alerts for consumers, families and businesses.

Open Data Building a Stronger Economy

NICK SINAI // October 29 2013

Every day young startups and large companies are using open government data to build new products and services that address real challenges for Americans. Fueled by open data, these enterprises are hiring people in cities and towns across the country. Open data are also helping the Federal Government to be more efficient, effective, data-driven, and transparent. We've seen the power of open government data in action—and it pays off.

ENERGY

The Energy Data Initiative

DEPARTMENT OF ENERGY // October 16 2013

To help harness the power of American ingenuity to solve our pressing energy challenges, the Obama Administration has launched the Energy Data Initiative.

The Energy Data Initiative is an Administration-wide effort to "liberate" government data and voluntarily contributed non-government data as fuel to spur entrepreneurship, create value, and create jobs in the transition to a clean energy economy.

Student Performance Data

DEPARTMENT OF EDUCATION // October 01 2013

The U.S. Department of Education announced today the release of student performance data in reading and math for all schools in the country for school years

2008-09, 2009-10 and 2010-11. This is the first time the Department is releasing school-level state assessment data. The data are being released as part of the

Department's ongoing transparency efforts.

Common Education Data Standards

A national collaborative effort to develop voluntary, common data standards for a key set of education data elements to streamline the exchange and comparison of data across institutions and sectors.

College Cost and Transparency

The College Navigator increases transparency around college costs and lets you find information about tuition and net prices at postsecondary institutions.

ABOUT DATA.GOV

The purpose of Data.gov is to increase public access to high-value, machine-readable datasets generated by the Executive Branch of the Federal Government.

As a priority Open Government Initiative for President Obama's administration, Data.gov increases the ability of the public to easily find, download, and use datasets that are generated and held by the Federal Government. Data.gov provides descriptions of the Federal datasets (metadata), information about how to access the datasets,

and tools that leverage government datasets. The data catalogs will continue to grow as datasets are added. Federal, Executive Branch data are included in the first version of Data.gov.

Data.gov is managed by the U.S. General Services Administration.

Participatory Democracy

Public participation and collaboration is the key to the success of Data.gov. Data.gov enables the public to participate in government by providing downloadable Federal datasets to build applications, conduct analyses, and perform research.

Data.gov will continue to improve based on feedback, comments, and recommendations from the public and therefore we encourage individuals to suggest datasets they'd like to see, comment on current datasets, and suggest ways to improve the site.

Goal

A primary goal of Data.gov is to improve access to Federal data and expand creative use of those data beyond the walls of government by encouraging innovative ideas (e.g., web applications).

Data.gov strives to make government more transparent and is committed to creating an unprecedented level of openness in Government. The openness derived from Data.gov will strengthen our Nation's democracy and promote efficiency and effectiveness in Government.

OPEN DATA ECOSYSTEM

The purpose of Data.gov is to increase public access to high-value, machine-readable datasets generated by the Executive Branch of the Federal Government.

METRICS

The purpose of Data.gov is to increase public access to high-value, machine-readable datasets generated by the Executive Branch of the Federal Government.
